

**SUBJECT: Product Safety Policy**

Westport Fuel Systems Italia S.r.l., a leading fuel system provider in Design and Manufacturing of component systems for alternative fuel vehicles, intends to improve steadily the quality of products and services offered to customers, through the implementation of a management system according to Technical Specification IATF 16949:2016 and UNI EN ISO 14001:2015.

The primary objective is to develop products that assist in preventing accidents from occurring or, in the event an accident does occur, to minimize the consequences for the drivers and others on the road.

The safety management program covers the product quality related to safety and suppliers control process.

The definition of safety not only includes the safety of the immediate user of our products, but also understanding the entire scope of potential impact of our products on society.

From this point of view, Westport Fuel Systems Italia S.r.l. sets the following objectives:

- Maintain the leadership of component systems for alternative fuel vehicles, at the same time encouraging the synergy with other groups in Westport Fuel Systems, with special focus on Product Safety
- Implement and monitor the deployment of this policy internally and to sub-suppliers
- Strive to achieve zero accidents with Westport Fuel Systems Italia S.r.l. products through the design and manufacturing of high quality products and cooperation with our customers for the correct application

The Top Management promotes the implementation of this Safety, Environmental and Quality Policy through quantified goals, identification of resources and methods which are necessary to reach them in the defined time frame and it is committed to improve its Management System with the aim to improve its product quality.

Periodically the state of application of the present Product Safety Policy is verified and revised during the Management's review.
