

SCOTT BAKER***Vice President, Engineering and General Manager, Vancouver Operations***

Scott Baker is **Vice President, Engineering and General Manager, Vancouver Operations** at Westport Fuel Systems. He joined Westport Fuel Systems in 1998 as Application Engineering Leader and has since worked in a variety of roles, including product planning and product management positions in addition to serving as Chief Engineer, Senior Director of Purchasing and Supplier Quality, and Vice President of Westport's High Pressure Direct Injection Business, before assuming his current role in 2019.

Baker's more than 20 years of experience in the heavy-duty commercial vehicle industry includes a multi-year secondment to the Cummins Westport joint venture (2001-13), during which time Baker was involved in multiple engine and fuel system development programs with significant commercial, technical, customer-facing, and supplier-facing responsibilities.

Baker holds a Bachelor of Applied Science degree in Mechanical Engineering from the University of British Columbia.

About Westport Fuel Systems

At Westport Fuel Systems, we are driving innovation to power a cleaner tomorrow. We are a leading supplier of advanced fuel delivery components and systems for clean, low-carbon fuels such as natural gas, renewable natural gas, propane, and hydrogen to the global transportation industry. Our technology delivers the performance and fuel efficiency required by transportation applications and the environmental benefits that address climate change and urban air quality challenges. Headquartered in Vancouver, Canada, with operations in Europe, Asia, North America, and South America, we serve our customers in more than 70 countries with leading global transportation brands. At Westport Fuel Systems, we think ahead. For more information, visit www.wfsinc.com.
